

# COMMERCIAL EXHIBITOR INFORMATION

**Booth Spaces.** The floor plan illustrates all booth spaces as 10 x 10 spaces. As we assign space we will begin to have islands, peninsulas, and linear booths as requested. The committee will do everything to accommodate your space request, however, if your choices are taken then you will be assigned a like space as close to your choices as possible.

**Electrical.** All booths will be provided with a 115V outlet with two connections. At this time no other voltage options are available.

**Exhibit Guidelines.** Exhibit materials in the booth cannot be over 48" h in the front 5' feet of your booth space if you are in a linear booth with another booth adjacent to your booth. All measures must be taken to meet these guidelines. Exceptions must be approved by the commercial exhibit superintendant at time of set-up.

**Outdoor Booth Space.** There will be space available outside on the grounds on a quote basis for larger exhibits or exhibitors who prefer to be outdoors.
